INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY

Continuous pulmonary C-fiber stimulation produces sustained reflex cardiovascular depression
E. R. Schertel and D. A. Allen

α-Adrenergic-mediated reflex responses to induced muscular contraction are changed with age in dogs
G. C. Haidet

Carotid baroreflex responsiveness during dynamic exercise in humans
J. T. Potts, X. R. Shi, and P. B. Raven

Progressive loss of vasodilator responsive component of pulmonary hypertension in neonatal calves exposed to 4,570 m
A. G. Durmowicz, E. C. Orton, and K. R. Stenmark

Pages H1082–H1088: Timothy C. Love and Diane C. Tucker. “Possible paracrine facilitation of ventricular growth in oculo by atrial tissue.” Page H1085: Figure 3 should appear as follows.

Fig. 3. Mass of grafts after 8 wk in oculo is presented as wet weight (means ± SE). Atrial grafts achieved a larger mass than ventricular grafts after 8 wk in oculo. Ventricular grafts cocultured with an atrial graft achieved a larger mass than ventricular grafts cultured alone or with another ventricular graft (*P < 0.001).
