American Journal of Physiology-Heart and Circulatory Physiology

Scope of Journal
The American Journal of Physiology-Heart and Circulatory Physiology brings you the most distinguished reporting of leading-edge findings in the field.

AJP-Heart and Circulatory Physiology covers all areas of the cardiovascular physiology, including:

- experimental and theoretical studies of cardiovascular function from the whole organism to cellular, subcellular, and molecular levels
- critical new insights into the mechanisms that determine the performance of the normal and abnormal heart and circulation
- timely editorial reviews

Authors are required to submit papers online at www.apscentral.org.

A Few HOT Articles
Biology of bone marrow-derived endothelial cell precursors
Gina C. Schatteman, Martine Dunnwald, Chunhua Jiao

Paul E. Szmitko, Subodh Verma
Am. J. Physiol. Heart Circ. Physiol. May 01, 2005; 288: 2023-2030

Endothelial dysfunction: a multifaceted disorder (The Wiggers Award Lecture)
Michel Féletou, Paul M. Vanhoutte

Regulation of a voltage-sensitive release mechanism by Ca2+-calmodulin-dependent kinase in cardiac myocytes
Jiequan Zhu, Gregory R. Ferrier

Physiological time-series analysis using approximate entropy and sample entropy
Joshua S. Richman, J. Randall Moorman

Reader & Author Benefits
- Fully searchable text, including PubMed
- Rich color and sharp resolution of figures
- Editor’s Home Page at www.the-aps.org/publications/ajpheart
- FREE access to the extensive collection of back issues available online 12 months after publication
- FREE e-mail notification of new content as it becomes available
- Manuscripts online within days of acceptance
- Perpetual/Electronic Archiving of the LOCKSS and CLOCKSS systems preserves the electronic content of all APS journals.

AuthorChoice
www.authorchoice.org

Authors can choose to pay $2,000 on top of regular author fees and have their article made free immediately.

To start your SUBSCRIPTION, e-mail: subscriptions@the-aps.org
To submit your MANUSCRIPT go to: www.apscentral.org

FURTHER INFORMATION: E-mail: subscriptions@the-aps.org, Call 301-634-7180, Fax 301-634-7418, or mail to The American Physiological Society, 9650 Rockville Pike, Bethesda, MD 20814-3991 (USA)
Under the NIH Public Access Policy, NIH is asking its funded investigators to voluntarily submit to PubMed Central (PMC) the author's final manuscript of articles resulting from research supported in whole or in part with direct costs from NIH. According to the NIH, this policy applies only to manuscripts accepted for publication on or after May 2, 2005.

If you choose to submit your accepted manuscript to PMC, you will be asked to indicate when that manuscript should be made available to the public. As copyright holder of your article, the APS has the sole right to publish or disseminate it. However, the APS grants you permission to allow public release of your manuscript through PMC 12 months after publication in the print version of an APS journal.

This period of time is consistent with our existing policy to make all content publicly available through HighWire Press 12 months after print publication. NIH will be able to determine when 12 months have elapsed because APS sends NIH electronic feeds of the article metadata upon publication in a journal issue. Therefore, you can submit your accepted manuscript to PMC at the time of acceptance to an APS journal, and will not have to calculate or track time elapsed from publication.

NIH intends to use the PMC database of manuscripts for portfolio management; to create a permanent archive of articles based upon NIH-funded research; and to give the public access to research publications. In announcing this policy, NIH officials underscored that it is voluntary and there will be no sanctions of any kind against authors who do not submit their manuscripts. If you have any questions with respect to the NIH Public Access Policy and the publication of your article in an APS journal, please contact Margaret Reich at mreich@the-aps.org.
CALL FOR NOMINATIONS

for the Editorship of

Physiological Reviews

Nominations are invited for the Editorship of Physiological Reviews to succeed S. L. Hamilton, who will complete her term as Editor on December 31, 2008. The Publications Committee plans to interview candidates in the Spring of 2008.

Applications should be received before February 15, 2008.

Nominations, accompanied by a curriculum vitae, should be sent to the Chair of the Publications Committee:

Kim E. Barrett, Ph.D.
APS
9650 Rockville Pike
Bethesda, MD 20814-3991
The American Physiological Society

MEMBER BENEFITS

Your Professional and Career Development

APS embraces a wide variety of disciplines devoted to human and animal health and function—including systems biology, genomics, translational research and all other life sciences.

Meet like-minded colleagues through the following distinctive groups:
• Serve on APS sections—and—APS committees
• Serve on special interest groups
• Organize an APS conference
• Serve on FASEB boards and committees
• Participate in APS education programs
• Participate in APS honors and awards programs

Your Access to the Scientific Community

• Discount registration rates for Experimental Biology
• Discount registration rates for APS Conferences
• Specialized listservs

Your Source for Information Services

• Free online access to current content and the legacy content of all 15 APS research journals (this legacy content is an online package of over 100 years of historical scientific research, and is normally $2,000 for nonmembers)
• Free essential color figures to APS members (Regular and Student) who are first or last authors of articles published in any APS journal
• Free print subscriptions to 3 of APS’s 15 research journals (Physiology, Advances in Physiology Education, and The Physiologist)—and over 50% discount on the other 12 APS print research journals
• 20% discount on subscription to Annual Reviews
• Up to 75% discount on APS scholarly books
• Over 30% discount on subscription to the AAAS Signal Transduction Knowledge Environment
Access to current international peer-reviewed research is an essential element in enabling scientists, researchers, policy-makers and medical practitioners in developing countries to find local solutions to local health, environmental, social, economic, and food issues.

To answer this call, this journal is available free or at very low cost within institutions in more than a hundred of the world's poorest countries in partnership with the World Health Organization's HINARI initiative.
