Scope of Journal

Physiology is a journal of cross-cutting physiological research that publishes invited review articles written by leaders in their fields. These articles are peer-reviewed and highlight major advances in the broadly defined field of physiology. The journal also publishes shorter articles that either highlight important emerging topics and technologies or explore differing points of view. Finally, the journal identifies and briefly summarizes some of the most exciting new papers in physiology. With a new format that is both exciting and attractive, the journal is a valuable tool for researchers, educators, and students. Physiology is published jointly by the International Union of Physiological Sciences and The American Physiological Society. It is indexed by Medline and PubMed.

A Few HOT Articles

Muscle Fatigue: Lactic Acid or Inorganic Phosphate the Major Cause?
Håkan Westerblad, David G. Allen, Jan Lännergren
Physiology Feb 01, 2002; 17: 17-21

Lipid Rafts, Detergent-Resistant Membranes, and Raft Targeting Signals
Deborah A. Brown
Physiology Dec 01, 2006; 21: 430-439

The Physiological Regulation of Thirst and Fluid Intake
Michael J. McKinley, Alan Kim Johnson
Physiology Feb 01, 2004; 19: 1-6

SIRT1: Linking Adaptive Cellular Responses to Aging-Associated Changes in Organismal Physiology
Dimitrios Anastasiou, Wilhelm Krek
Physiology Dec 01, 2006; 21: 404-410

Mitochondrial Ion Channels: Gatekeepers of Life and Death
Brian O’Rourke, Sonia Cortassa, Miguel A. Aon
Physiology Oct 01, 2005; 20: 303-315

Features for Researchers...Educators...and Students
From ALL Fields of Science

- Editor’s Home Page at www.the-aps.org/publications/physiol
- Access to articles 12 months after publication
- Highlights from the Literature: a summary of approximately 12-15 current papers nominated by editors around the world
- Emerging Topics: brief discussions of new concepts in physiology
- Point/Counterpoint: collegial discussions of opposing viewpoints
- Emerging Tools and Technologies: discussions of new methodologies of interest
- Beautifully drawn and colorful figures bring the science to life
Instant Access to Accepted Papers Online

The American Physiological Society publishes online—within only days after their acceptance—peer-reviewed papers submitted to our prestigious research journals. Articles in PresS dramatically reduce time to publication.

**APS Articles in PresS are citable, searchable in PubMed, and will establish publication priority.**

These articles are published in PDF format and reflect the original, unedited, accepted version, as submitted by the author.

Once a paper is published online as an Article in PresS, it proceeds through the established course of thorough copyediting and production, leading to its publication (about 9 weeks later) in the final online and print editions of the appropriate APS Journal. This final version will bear the date, volume, and page numbers as well as the Articles in PresS publication date and identifier, called the DOI.

After the journal issue is published online and in print, the final version of the paper will come up on search while the Articles in PresS version will be stored in an accessible, permanent archive.

**Sample Citation for an Article in PresS:** Scaramella LE, Winter A, and Swinney DC. Quantitative expression analysis of the cellular specificity of HECT-domain ubiquitin E3 ligases. Physiol Genomics (April 26, 2001). doi:10.1152/physigend00075.2001.

**Citation of a paper that was first published in Articles in PresS will appear in print as follows:** Scaramella LE, Winter A, and Swinney DC. Quantitative expression analysis of the cellular specificity of HECT-domain ubiquitin E3 ligases. Physiol Genomics 4: 147-153, 2001. doi:10.1152/physigend00075.2001.

**Articles in PresS**
The Late-Breaking Abstract submission site is now open. Deadline for submission is Wednesday, February 24, 2010.

All accepted Late-Breaking Abstracts will be presented on Wednesday, April 28, 2010.

Submit your abstract today online at www.experimentalbiology.org.

EXPERIMENTAL BIOLOGY 2010 OFFERS:
- Same registration fees as 2009!
- Access to 6 collective society meetings in one location with one registration fee
- More than 50 concurrent scientific sessions open to all attendees spanning the scientific disciplines of the sponsoring societies
- Over 400 exhibit booths representing nearly 300 companies
- 4 days of poster sessions with over 5,000 poster displays and author presentations
- Over 90 award programs of more than $700,000 in travel funding opportunities and poster competitions (awards vary by society)
- Over 65 countries represented annually at the meeting creating a diverse audience
- CME credits available (ASIP sessions only)
- Extensive career development opportunities for students and postdoctoral fellows

After submitting your Late-Breaking Abstract, don’t forget to register for the meeting! Register before Wednesday, February 24, 2010 for the lowest registration fees.
