Pages H523–H532: Jia G, Stormont RM, Gangahar DM, Agrawal DK: Role of matrix Gla protein in angiotensin II-induced exacerbation of vascular calcification. Am J Physiol Heart Circ Physiol 303: H523–H532, 2012. First published July 13, 2012; doi:10.1152/ajpheart.00826.2011 (http://ajpheart.physiology.org/content/303/5/H523).—In Fig. 2B, the immunofluorescence image representing the control group was inadvertently presented again for the ANG II + Losartan group. The image panel for the ANG II + Losartan group has now been replaced with the appropriate one. The changes made do not affect the interpretation of the data. The authors sincerely apologize for the error and for the inconvenience to the journal and the readers.

MGP expression of VSMCs in vitro
